

# DON'T MAKE ME STEAL

## Digital Media Consumption Manifesto

### I PROMISE

never to illegally download a movie if there was a legal alternative following the criteria on this page

### THE CRITERIA

#### 1 Pricing

In general I want the pricing model to be simple and transparent. I don't mind a slight difference in pricing between movies with regard to the age of the movie.

- Rentals should not exceed 1/3 of the cinema price.
- Purchases should not exceed the cinema price.
- Monthly flat rate prices should not exceed 3 visits to the cinema.
- Pricing of TV shows is about 1/3 of movies.
- Payments are for the content, not bandwidth.

#### 2 Languages

- I can obtain the audio in every language produced for the content.
- After purchasing a movie, all the languages are available.
- Fans are legally allowed to create and share subtitles for any content.

#### 3 Convenience

- The content I paid for is instantly available.
- Content is delivered without ads, or disrupting infringement warnings.
- I can find movies or TV shows by year, director, language, country, genre, IMDB ID, etc.

#### 4 Choice And Release Dates

- The release date is global. There are no limits regarding the country you live in.
- I can download nearly every movie ever made.

#### 5 Rights

- I can watch the movie on any device, without any differences in how the movie is presented.
- Movies are not bound to the service provider, and must be DRM-free in the case of purchases.
- I can easily understand my rights regarding movies that I rent, buy, or stream at a flat rate.
